AQUIB ISRAR

SEO MANAGER | GEO & AEO SPECIALIST

+91 78381 05678 | aquibisrar1@gmail.com | linkedin.com/in/aquibisrar | Delhi, India

SUMMARY

SEO Manager with 6+ years turning organic search into a lead and revenue channel, not a traffic vanity metric. Currently leads SEO and GEO strategy for UDIT (formerly IIAD); previously built and owned AND Academy's full-funnel organic engine delivering ~5,000 leads, 300+ applications, and ~200 enrollments a year (approx. INR 2 crore in revenue) across SEO, GEO, and AEO. Strong in technical and semantic SEO, Generative Engine Optimization, AI Overview eligibility, and structured data, backed by self-built audits, dashboards, and Chrome extensions.

ORIGINAL RESEARCH & PRESS

- **Press & Recognition:** Original crawler-identification research featured by PPC Land (June 2026) and cited by Havas Media Germany's Director of Programmatic Marketing.
- **AI Mode Citation Architecture:** Reverse-engineered how Google AI Mode hides citations inside HTML comments as UUID-linked passages, invisible to link parsers and to commercial AI-visibility tools.
- **Vernacular Search Discovery:** Found a Unicode regex technique in Google Search Console (\p{Script} classes) that surfaces vernacular-script demand hidden inside long-tail queries.
- **ChatGPT Citation vs Recommendation Analysis:** Analyzed ChatGPT network traffic to expose the gap between search-grounded citations and ungrounded, model-trained recommendations.
- **Controlled GEO Citation Experiment:** Designed a three-site test isolating content structure, listicle vs prose vs schema, as a variable in AI citation across ChatGPT, Perplexity and Claude.

PROFESSIONAL EXPERIENCE

Assistant Manager, SEO
08/2026 – Present

UDIT (formerly IIAD)
Gurugram

- Lead SEO and Generative Engine Optimization strategy for UDIT, owning organic search growth and AI visibility across ChatGPT, Perplexity and Google AI Overviews.
- Run the IIAD-to-UDIT domain and content migration end to end: blog consolidation, cannibalization audits and redirect mapping to hold rankings through the transition.
- Drive E-E-A-T enrichment and Helpful Content compliance across course and blog templates.
- Track AI citation performance and search visibility using Google Search Console, Microsoft Clarity and custom reporting dashboards.
- Partner with academic and content teams to tie organic strategy to admissions and enrollment targets.

Assistant Manager, SEO
01/2025 – 07/2026

AND Academy (IIAD x Kingston School of Art)
New Delhi

- Audited client-side vs server-side rendering across course and blog templates, comparing raw and rendered HTML in Screaming Frog to verify that primary copy, internal links and JSON-LD shipped in the server response rather than being injected after load; rebuilt the CSR-dependent modules that were hiding content and link equity from crawlers and from AI answer surfaces.
- Led post-December 2025 Google Core Update recovery, diagnosing three root causes (index bloat surfaced by a 1,000+ URL audit with 442 URLs flagged, 482 cannibalized queries, and a server-level cloaking breach on a partner domain) and recovering 20 to 30% of traffic on declining pages.
- Grew organic impressions 86%, from 5.07M to 9.42M monthly in GSC, and improved average position from 23 to 10, moving priority commercial terms from page 4 into the top 5 to 10 through technical fixes and an internal-linking overhaul.
- Owned a full-funnel organic engine driving roughly 5,000 leads a year into 300+ applications (5 to 6% lead-to-application) and about 200 enrollments (~65% admission rate), approximately INR 2 crore in annual revenue, across SEO, GEO and AEO.
- Built a Generative Engine Optimization program from scratch, now contributing about a fifth of organic conversions, with a share-of-answers dashboard and competitor benchmark across ChatGPT, Perplexity, Gemini and Google AI Overviews.
- Designed a layered schema framework (Course, FAQ, Article, EducationalOrganization, Person, BreadcrumbList) and restructured course and program pages with definition-first answer blocks and comparison tables to win AI Overview citation alongside lead capture.
- Built the team's analytics backbone on the Google Search Console API, including a custom GSC MCP server and an 11-module Looker Studio reporting stack that automates monitoring and surfaces content-decay and cannibalization signals early.
- Deployed a content-decay detection system feeding refresh, consolidation and AEO-restructuring workflows to protect and reclaim rankings on aging high-value pages.
- Scaled the blog library 2.4x, from 200 to 480 pages in one year, with keyword and search-intent mapping plus internal linking into course pages, building topical authority instead of index bloat.
- Strengthened E-E-A-T across course and blog pages with author and Person schema, mentor bylines, reviewer attribution and subject-expert quotes coordinated with the Academic Head.

- Owned end-to-end organic strategy for andacademy.com (India) and the international /en site: content architecture, technical and semantic SEO, structured data and AI Overview eligibility.
- Shipped interactive on-page tools (font pairing, color contrast, aspect ratio and brand-palette builders) to lift blog engagement and earn natural links, and won city-level demand with hyperlocal city-by-course listicles for Bangalore, Chennai, Kolkata, Mumbai and Delhi.
- Led a five-person content and SEO team plus an external agency on briefs, editorial QA and publishing cadence, and fed organic search-term and intent data into Google Ads keyword, negative-keyword and landing-page decisions.

Assistant Manager, SEO (promoted from Senior Executive, SEO) **11/2021 – 12/2024**
Yujji (DayLite Solutions), DCOIL EdTech *Gurugram*

- Promoted to Assistant Manager after two years as Senior Executive; grew top-3 rankings from 6 to 18 while managing 5 to 7 freelance writers at 98% on-time delivery through structured briefs and editorial QA.
- Lifted organic sessions 38% QoQ and new users 31% (GA4) by shipping 8 to 10 QA'd SEO articles a month.
- Launched the DCOIL guest-lecture pipeline (50+ talks in six months, roughly 300 qualified leads, 15 partner MoUs) and a Reddit ambassador program for organic backlinks.

SEO & Content Marketing Executive **10/2018 – 11/2020**
Starmass Environment Technologies Corp. *Hyderabad*

- Ran keyword research and search-intent mapping for the Saudi Arabian market, and built a localized content strategy on top of it across editorial, blog, email and social.
- Handled on-page optimization across the content library: title tags, meta descriptions, heading hierarchy and internal linking.
- Ran off-page outreach and guest posting to build backlinks, and secured publications on Springer- and Scimago-indexed platforms.

SEO Content Writer **02/2018 – 07/2018**
The Policy Times *New Delhi*

- Authored articles on politics, economics, and national and international policy for a national policy publication.
- Ran keyword research ahead of each brief and optimized drafts on-page, covering title tags, meta descriptions, heading structure and keyword placement.

SELECTED BUILDS & FRAMEWORKS

- **Atlas SEO Chrome Extension (proprietary, Manifest V3):** Zero-API, client-side SEO audits with JSON-LD linting, JavaScript render analysis and entity-gap checks; replaces four to five paid tools.
- **Custom Google Search Console MCP Server:** Programmatic GSC access that automates query and page monitoring and surfaces cannibalization and decay signals without manual pulls.
- **Screaming Frog Semantic Analysis Pipeline (Gemma Embedding 001):** Page-level embeddings and cosine similarity for topic clustering, cannibalization detection and content-gap mapping.
- **Blog Content Pruning & Consolidation Engine:** Pre and post Core Update GSC comparison with a Recovery Priority Score; triaged 1,000+ URLs into keep, merge, redirect or delete.
- **E-E-A-T Enrichment Framework:** Three-pass Delete / Add / Edit audit (Excel plus Word playbook) aligned to Google's Helpful Content System.

EDUCATION

Master of Arts, Media and Governance · Jamia Millia Islamia, New Delhi 2016 – 2018
Bachelor of Science, Chemistry · Jamia Millia Islamia, New Delhi 2012 – 2015

TECHNICAL SKILLS

Crawl, Render & Diagnostics: Screaming Frog (Custom JS, Custom Search, Embeddings), Sitebulb, CSR vs SSR render-parity audits, JavaScript rendering analysis, index-bloat triage, redirect mapping, Chrome DevTools

Semantic SEO & Structured Data: Schema.org (Course, FAQ, Article, EducationalOrganization, Person, BreadcrumbList), JSON-LD authoring and linting, entity SEO, topical authority modeling, knowledge-graph signals, cosine-similarity clustering

GEO & AEO: AI Overviews and AI Mode optimization, AI citation tracking across ChatGPT, Perplexity and Gemini, share-of-answers measurement and competitor benchmarking, definition-first answer blocks, FAQ schema, featured snippets and People Also Ask

Analytics & Data: Google Search Console (API plus custom MCP server), Looker Studio, GA4, Microsoft Clarity, Semrush, Ahrefs

Development: JavaScript, Chrome Extension development (Manifest V3), JSON-LD, Gemma Embedding 001 pipelines, WordPress, HubSpot

Growth & Revenue: Full-funnel tracking from lead to application to enrollment, landing-page structuring, form and CTA placement, paid-organic keyword and negative-keyword intelligence, lead-quality analysis by source
